EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE

Applicant's election of Species XVI (figure 29), claims 20-25, 29, 31 and 33 readable thereon, in the reply filed on August 10, 2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, page 1, between the title and "Technical Field", the following paragraph was inserted:

-- This application is a 371 of PCT/JP2006/304516, filed March 2, 2006. --.

Claims 1-19, 26-28, 32 and 34-65 were canceled.

The claims were canceled as being claims non-elected without traverse as explained above, and/or as being claims not dependent upon an allowable elected claim.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on the PTO-892 discloses an optical system for extracting signal light components from a beam.

The following is an examiner's statement of reasons for allowance: the prior art of record considered as a whole fails to teach or suggest an optical system for extracting signal light components from a beam including the signal light components and stray light components, the optical system comprising: a condensing optical element situation on an optical path of the beam for condensing the beam; **a polarization changing unit including a combination of a polarization changing element and a reflecting part for changing a state of polarization of at least one of the signal light components and the stray light components included in the incident beam transmitted through the condensing optical element; and an extracting element for extracting the signal light components included in the beam transmitted through the polarization changing unit.** (bold language emphasized).

Art Unit: 2627

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Huber whose telephone number is 571-272-7588.
